

Sabina Janstrom is a highly regarded and accomplished Senior Project and IT Manager, offering over 15 years' experience within both sectors. Sabina is well travelled having worked in Australia, the Asia-Pacific and EMEA. This provide Sabina and QVC with a unique understanding of local and global IT projects, private and public sector organisations and regional variations in business practices. Sabina is a certified PRINCE2 Practitioner with extensive MS project and project server skills.

Sabina has a proven track record of leading teams to deliver projects and solutions on time and within budget. Her professional approach and practical experience enable

her to bring out the best in project resources, clearly communicate with senior business stakeholders, manage change at the organisation level and anticipate and mitigate potential delays.

Sabina's years of project and portfolio management are balanced with several years in senior management roles reporting to C-level executives, giving her practical knowledge of revenue generating departments, corporate governance, and making projects and portfolios work to benefit the business and advance business goals.

In recent years Sabina has used her knowledge to implement and create successful PMO's, deliver highly complex and structured digital projects, as well as restructuring and delivering global customer relationship management (CRM) applications to ten countries.

Sabina has an Honours Degree in Psychology and is currently completing her Master's Degree in Business.
