

Valentinus (Val) Pramana is a Project Management Professional with more than 18 years of combined engineering and project management experience. Val's professional career has seen him work in a variety of industrial environments, both locally and overseas. His most recent experience is managing electrical projects within the Australian mining industry. Val is a certified Project Management Professional (PMP®) within the Project Management Institute (PMI) and is currently working towards his PRINCE2 Practitioner certification from AXELOS.

Val believes in the use of a collaborative approach for managing good relationships with stakeholders at all levels and from various multi-discipline backgrounds. Val's work overseas and industrial experience provides an advantageous insight into the different values and objectives of high and low level employees.

Val is passionate about continuous improvement and delivering better results through the application of best practice project management methods. His unprecedented curiosity drives Val's 'different thinking', open-minded and problem solving attitude, which he instils in those around him. Val's active and inquisitive nature helps him learn systems and processes quickly, enabling him to achieve valuable results in a time effective manner.

Holding strong values in integrity, health and safety and quality, and with his client focus and collaborative teamwork practices Val is a beacon of leadership for project teams, both centralized and distributed, ensuring projects are delivered efficiently and in compliance to requirements.

Val holds a degree in Electrical Engineering.
